## PROFESSIONAL PROFILE

Full Stack Developer with proven expertise in Symfony, Twig, PHP, and modern web technologies. Specialized in designing and delivering complex systems that seamlessly integrate business logic, custom forms, session-based authentication, and secure file management. Proficient in Bootstrap for creating responsive, user-friendly interfaces, with hands-on experience in public sector, administrative, and registry management projects.

Committed to code quality, best practices, and performance optimization. Eager to contribute to collaborative teams by delivering stable, scalable, and well-structured solutions that drive results.

## WORK EXPERIENCE

### Full-Stack Symfony Developer - Ministerio de Infraestructura Servicios Públicos y Habitat

Mayo 2024 - Actualidad

- Designed and developed complete Symfony applications, covering all layers from database architecture to user interface.
- Built complex forms with entity relationships (e.g., Denuncia, Persona, Denunciante), implementing robust validations and conditional logic.
- Managed secure file uploads (PDF/images) and delivery through controlled access endpoints.
- Customized and adapted user interfaces to match institutional design guidelines using Bootstrap, custom components, and Twig macros.
- Developed authentication systems with session handling and data pre-loading from LDAP and other external sources.
- Implemented custom pagination and optimized data grid views for performance and usability.

**Tech Stack:** Symfony 6.x · Twig · PHP · Doctrine ORM · Bootstrap · JavaScript · MySQL · Git · GitLab

## EDUCATION & TRINING

IES - Tec. Desarrollo de Software (Studying)

Curso web “Desarrollo Web” (Coder House)

Curso web “Java Inicial” (Coder House)

Instituto Secundario Mariano Moreno (Completed)

Bachelor of Economics and Administration
